EDUCATION

Mahindra University

Hyderabad, Telangana

Bachelor of Technology in Computer Science

Sep. 2021 – Present

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Machine Learning, Computer Networks, Software Engineering, Big Data Technologies, Object Oriented Programming.
- Institute Merit Scholarship, 2022-23 & 2024-25

EXPERIENCE

Associate Business Process Analyst

Jun. 2024 – Dec. 2024

Schlumberger, Coimbatore, Tamil Nadu

- Optimized the course assignment process using Association Rule Mining, improving accuracy by 10 % and increasing user engagement by 15%.
- Designed and implemented an AI-powered Quiz Generator using the T5 Transformer, automating multiple-choice question generation and improving learning outcomes.
- Facilitated collaboration across cross-functional teams to streamline SAP workflows and curating 20+ training artifacts, fostering knowledge-sharing.
- Led data-driven decision-making by processing and visualizing course assignment data in Power BI, providing actionable insights and guiding stakeholders in optimizing resource allocation.
- Developed and presented Power BI report and Power Apps application to company leadership, automating a team-wide charity walking challenge, reducing manual data processing time by 90% with real-time dashboards and raised ₹50K.

Intern

Sep. 2021 – Oct. 2021

TradeSwift, Jaipur, Rajasthan

- Enhanced portfolio management strategies by leveraging historical data to evaluate 50+ assets.
- Automated the generation of financial reports, reducing manual effort and improving efficiency by 30% through data-driven insights.
- Conducted in-depth financial analysis, generating 10+ detailed reports in Microsoft Excel.
- Effectively communicated financial insights by delivering 10+ high-impact presentations, improving stakeholder engagement.

PROJECTS

Image Classifier

Oct. 2024

- Created a flower classification application, leveraging transfer learning with a pre-trained VGG network in PyTorch.
- Engineered robust command-line tool that implemented a custom feed-forward neural network with ReLU activations, reducing image classification processing time by 40% while handling over 500 concurrent requests.
- Achieved 85%+ accuracy on test data by optimizing the model through hyperparameter tuning and validation loss minimization.

Movie Recommender Systems | [Link](#)

Dec. 2023

- Built and deployed a machine learning content-based recommendation system, leveraging **NLP** techniques to analyze a dataset of 5,000 movies, utilizing vectorization and Bag of Words for feature extraction.
- Developed an interactive web interface using Streamlit, enabling real-time movie recommendations and providing a seamless user experience.
- Integrated TMDB API to dynamically fetch and display movie posters in real time, enhancing user experience by providing visual previews for each recommendation.

CERTIFICATIONS

Core Designer Certificate, **Dataiku**

Nov 2024

Recipient of AWS AI & ML Scholarship, **AWS**

Jun 2024

Software Engineering Job Simulation, **JP Morgan & Forage**

Mar 2024

Google Advance Data Analytics certification, **Coursera**

Jul 2023

Financial Knowledge Certification, **NISM**

Aug 2022

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, HTML/CSS

Developer Tools: Git, VS Code, Matlab, Tableau, Power BI

Python Libraries: Pandas, NumPy, Matplotlib, PyTorch
